— WHY ENNAT

Protection that absorbs impact

Instead of transferring it.

TRUSTED BY INDUSTRY LEADERS

100+ companies trust ENNAT

THE ENNAT FOOTPRINT

Born in Chile, at work around the world

19
COUNTRIES SERVED

1127
PROJECTS DELIVERED

15+
YEARS OF DEVELOPMENT

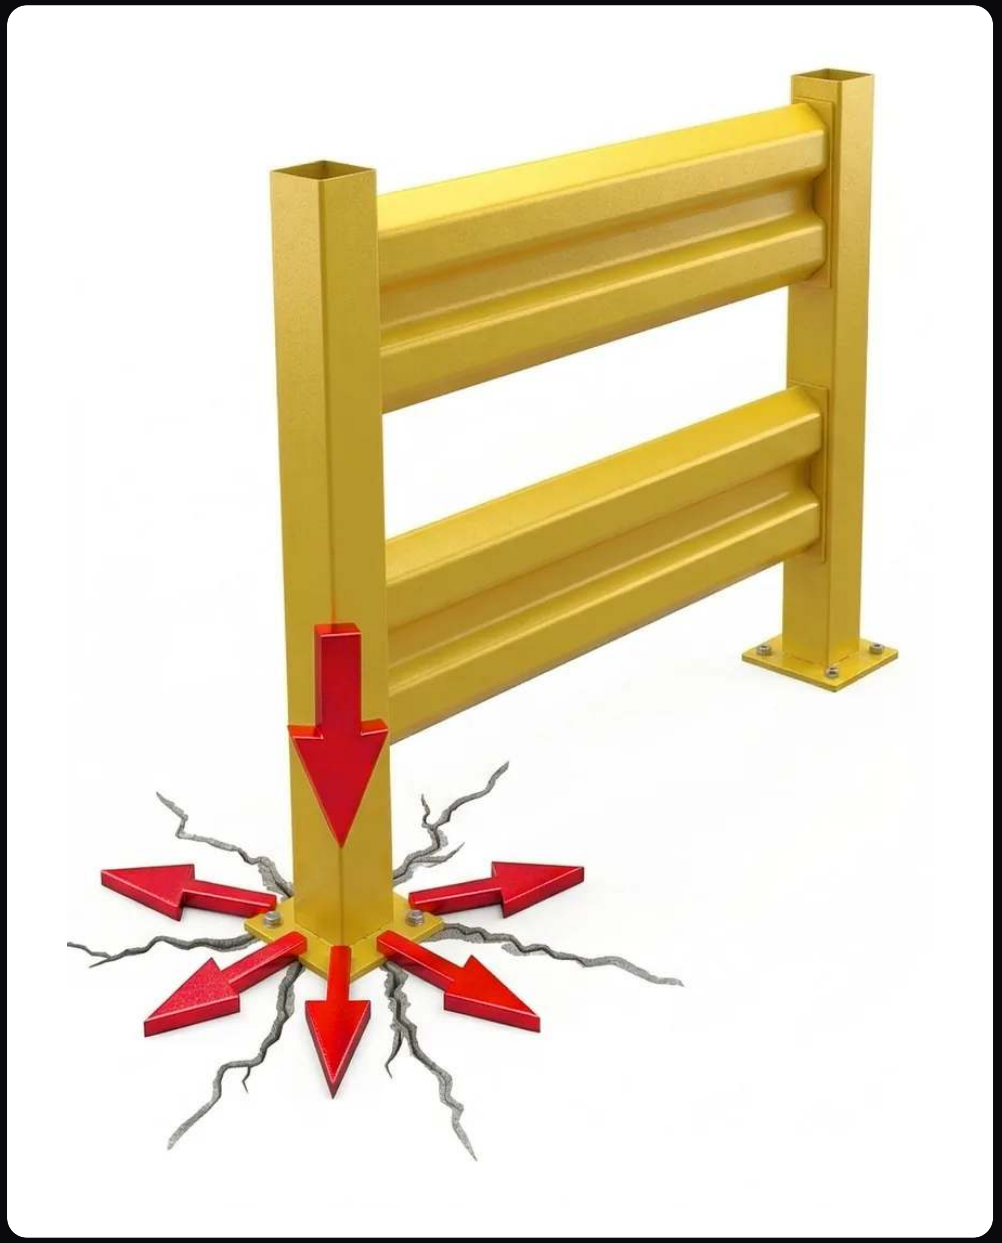
ENNAT office
Projects completed

THE HIDDEN COSTS

Steel fails. And the costs never stop.

THE CORE DIFFERENCE

Transfer vs. absorption



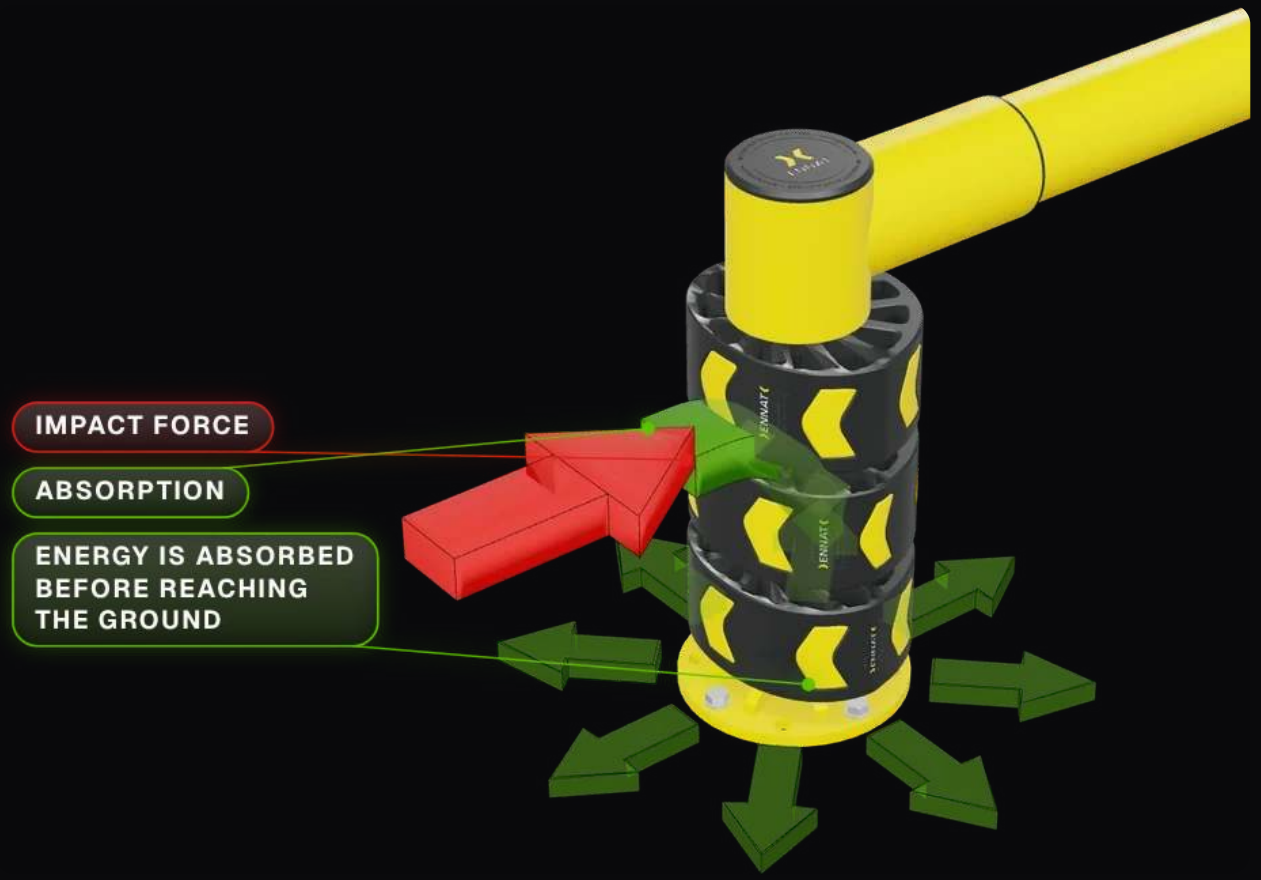
Metal: energy to the anchors

ENNAT: energy absorbed

DIRECT IMPACT

The rubber takes the hit, not the structure

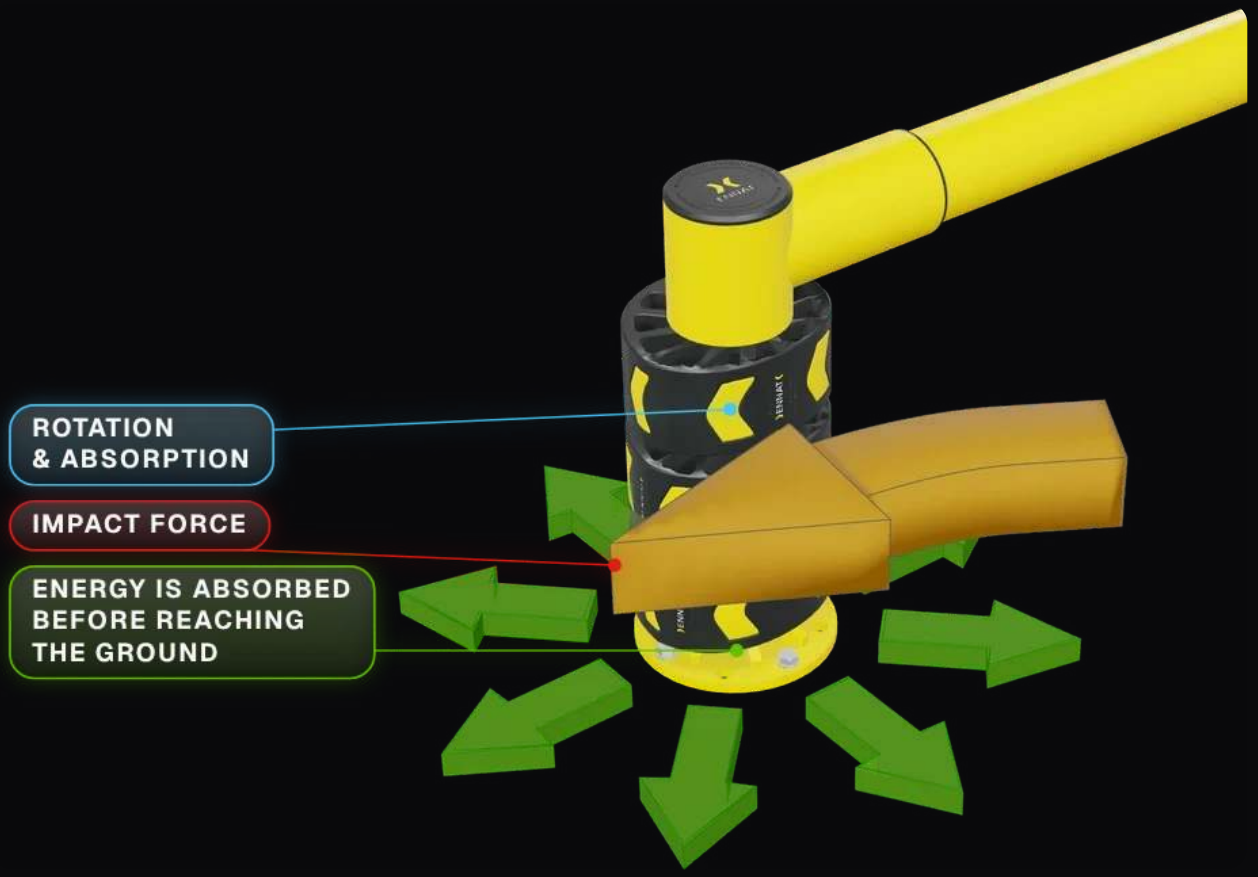
It decelerates gradually and the energy is absorbed at the base, without elongation, so far less of it reaches the structure behind it.



IMPACT WITH ROTATION

It rotates, and redirects the vehicle

Rotation smooths the deceleration and keeps the energy from reaching the structural base.



WHAT MAKES US DIFFERENT

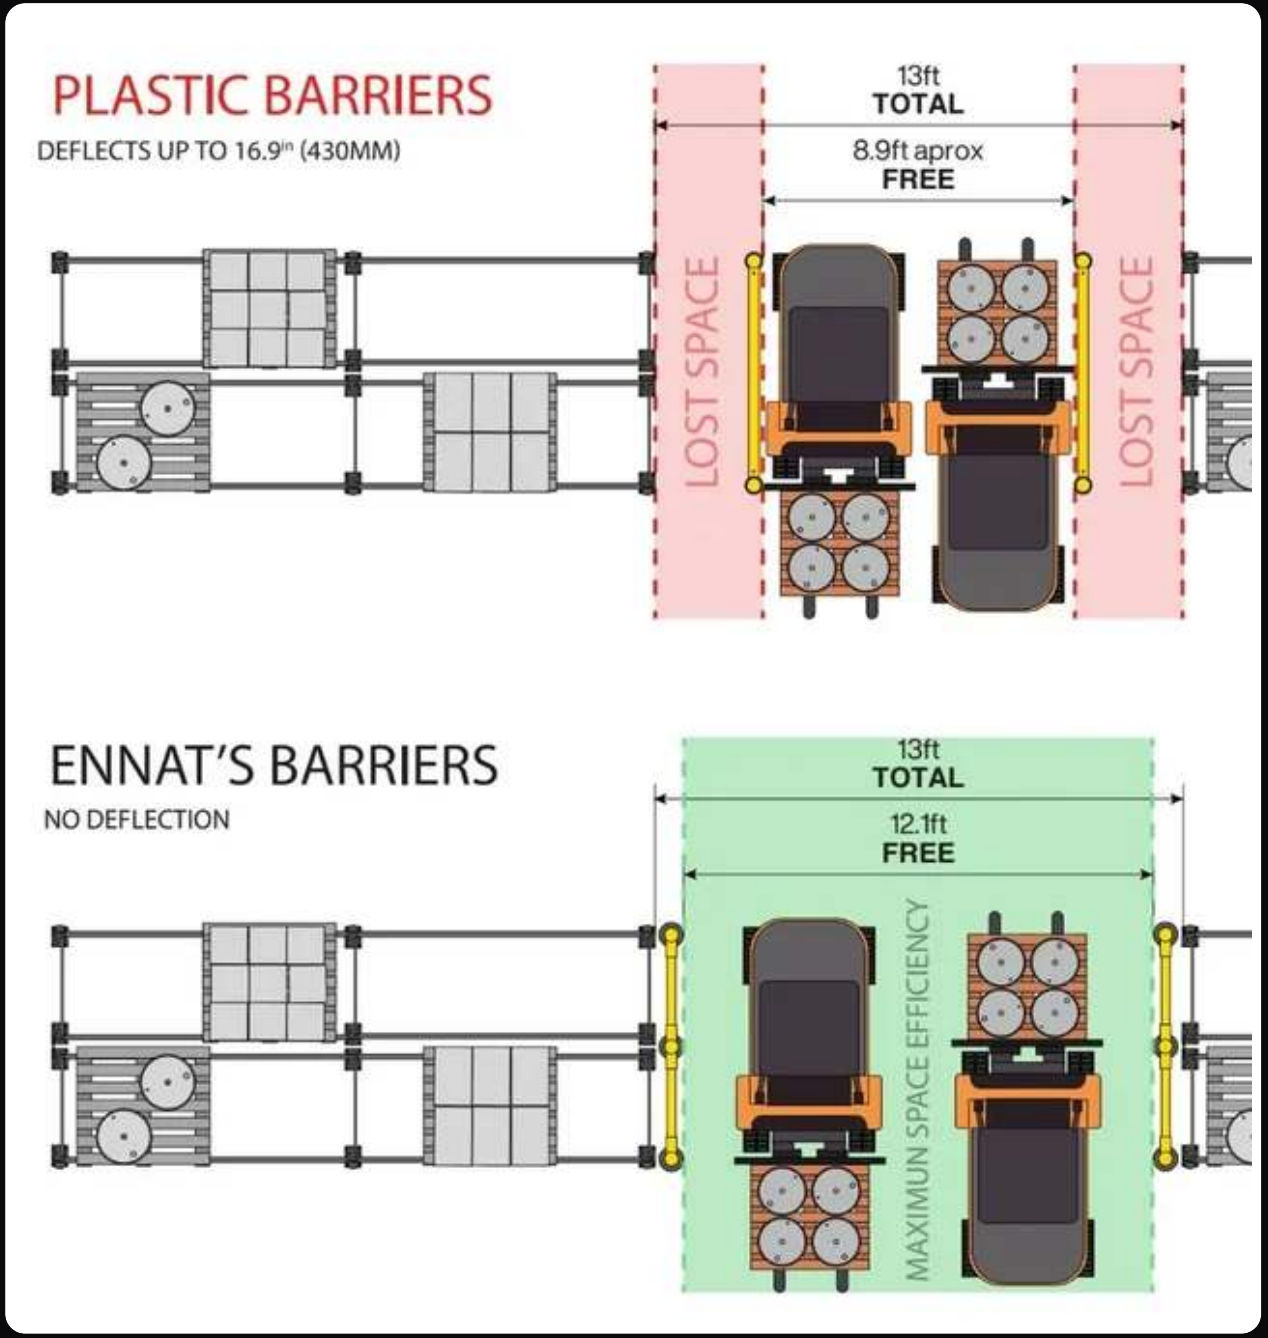
Steel for strength. Rubber for absorption.

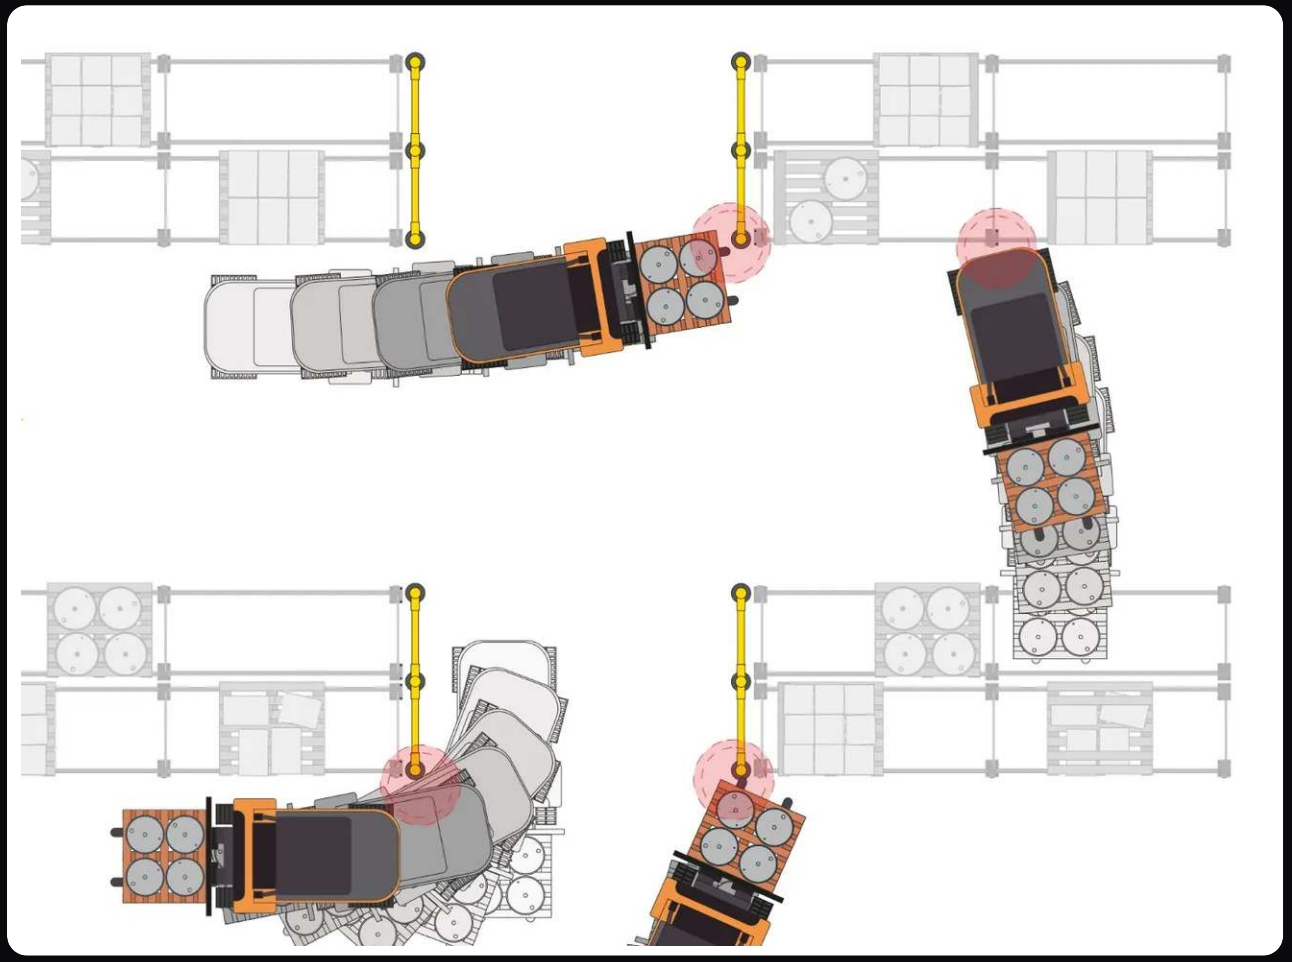
Controlled rotation dissipates impact before it reaches the anchors.

SPACE EFFICIENCY

No elongation. No wasted space.

Plastic flexes into the aisle. ENNAT doesn't.





WHERE IMPACTS HAPPEN

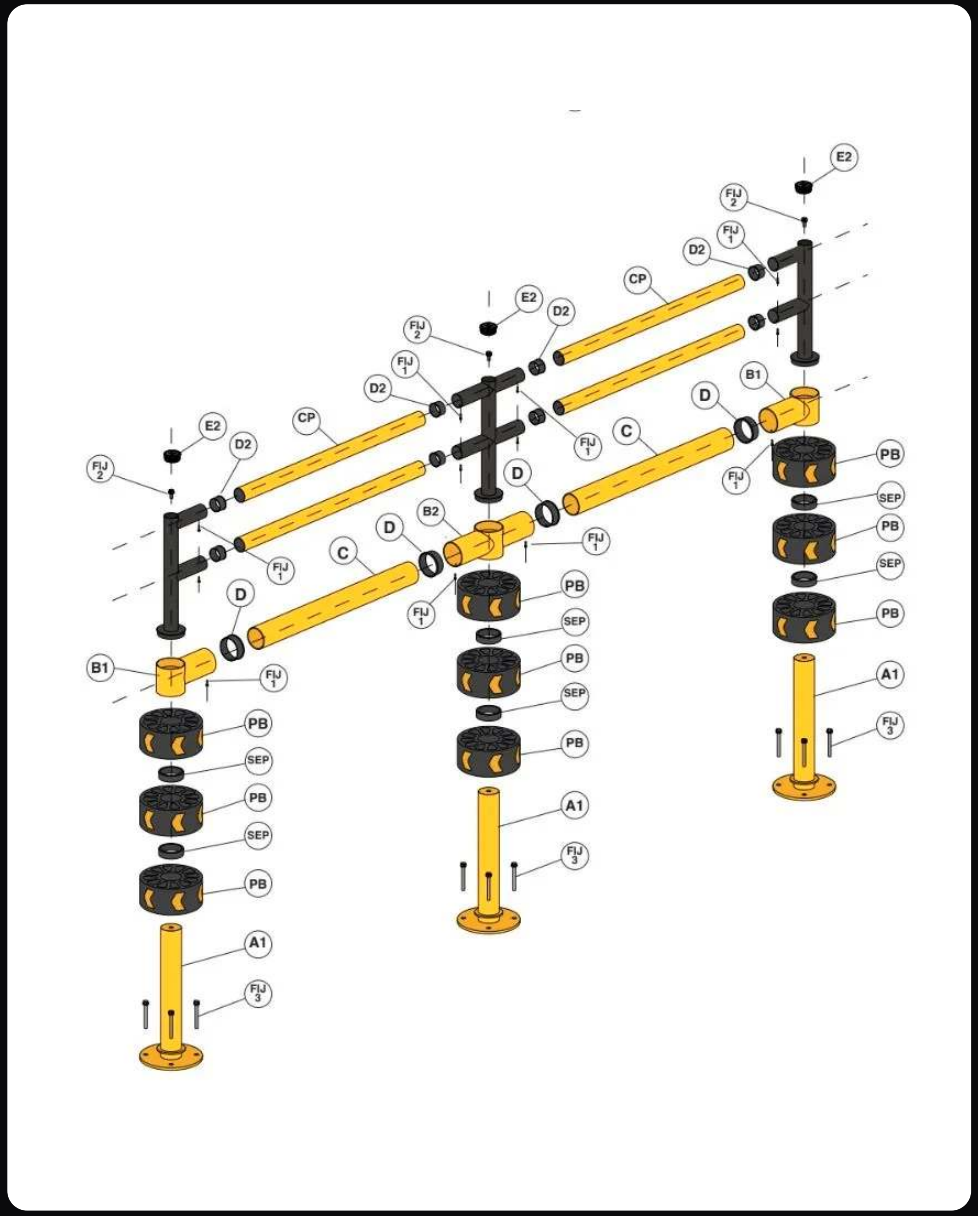
Absorbed at the bases — right at the most exposed corners

The modules rotate and redirect the forklift instead of stopping it dead.

ADAPTABILITY

Modular, built for your operation

Every component is separate. A damaged part is replaced on its own.



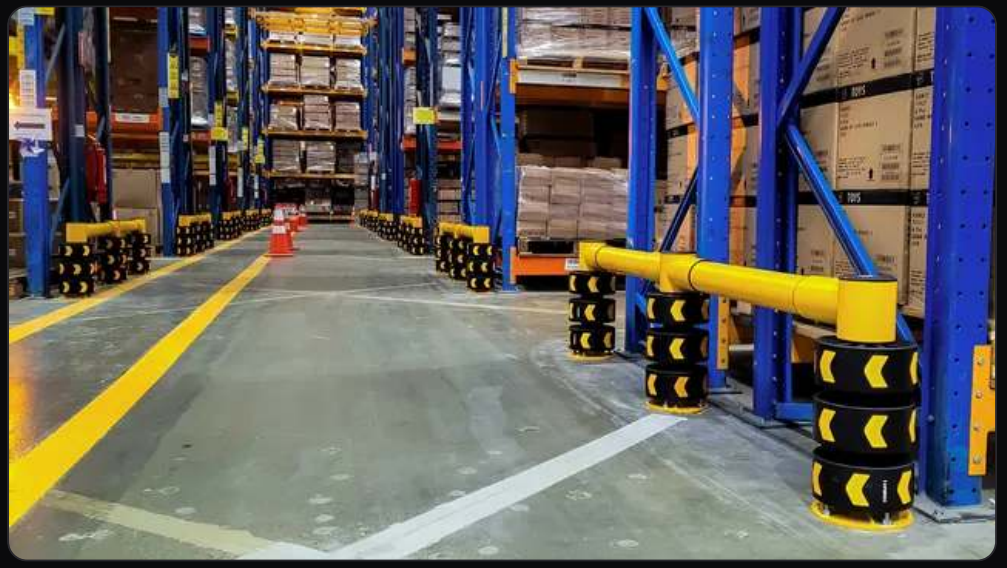
SITE ORDER

Order reflects care

Clean, defined protection signals that safety genuinely matters here.

SUCCESS CASE

From one pilot to six facilities



6	+416%	~14
FACILITIES	5-YEAR ROI	MONTHS PAYBACK

Traditional metal barriers only made it worse. After implementing ENNAT, performance exceeded expectations. We use it as the standard for new protected areas.

Adan Garcia
Sr. Program Manager, Tesla

ONE STANDARD BARRIER, FIVE YEARS

Metal ends up costing 7.1× more

STANDARD BARRIER

TOTAL COST OVER 5 YEARS

METAL BARRIER $15,004

ENNAT BARRIER $2,128

What each one costs over five years, all in: what you pay for it, plus every repair, hour of stopped work and forklift repair after an impact every 4 months. USD.

$12,876
SAVED IN 5 YEARS

OUR SOLUTIONS

One system, every critical area

Low Guardrail

0°F to 160°F Cold-Ready
15.7" Protective Height

Standard Guardrail

0°F to 160°F Cold-Ready
21.5" Protective Height
15.3kJ Impact

Pedestrian Guardrail

0°F to 160°F Cold-Ready
43.3" Protective Height
15.3kJ Impact

Double Guardrail

0°F to 160°F Cold-Ready
43.3" Protective Height
15.3kJ Impact

Roller Barrier

0°F to 160°F Cold-Ready
5.5" / 11" Protective Height
R2-1: 5.45kJ
R2-2: 5.75kJ
Impact

Bollard

0°F to 160°F Cold-Ready
7" - 39.5" Protective Height
7.2 kJ Impact

Fence Guardrail

0°F to 160°F Cold-Ready
84.5" / 118" / 150" Protective Height
15.3 kJ Impact

Grill - Tunnel Guardrail

0°F to 160°F Cold-Ready
79" / 110" / 138" Protective Height
15.3 kJ Impact

Goal Post

0°F to 160°F Cold-Ready
As required Protective Height
15.3 kJ Impact

Column Guardrail

0°F to 160°F Cold-Ready
Up to 43.3" Protective Height
15.3 kJ Impact

Column Protector

0°F to 160°F Cold-Ready
Up to 60" Protective Height

Rack Protector

0°F to 160°F Cold-Ready
Up to 44" Protective Height

Low Bumper

0°F to 160°F Cold-Ready
5.8" / 12.1" Protective Height

Pedestrian Gate

32°F to 122°F Cold-Ready
10.4" / 31.5" Protective Height

Sign Post

32°F to 122°F Cold-Ready
15.7" Protective Height

Delimiter

0°F to 160°F Cold-Ready
4" Protective Height

Steel Fence

0°F to 160°F Cold-Ready
Per model Protective Height

Dock Protector

0°F to 160°F Cold-Ready
15.7" Protective Height

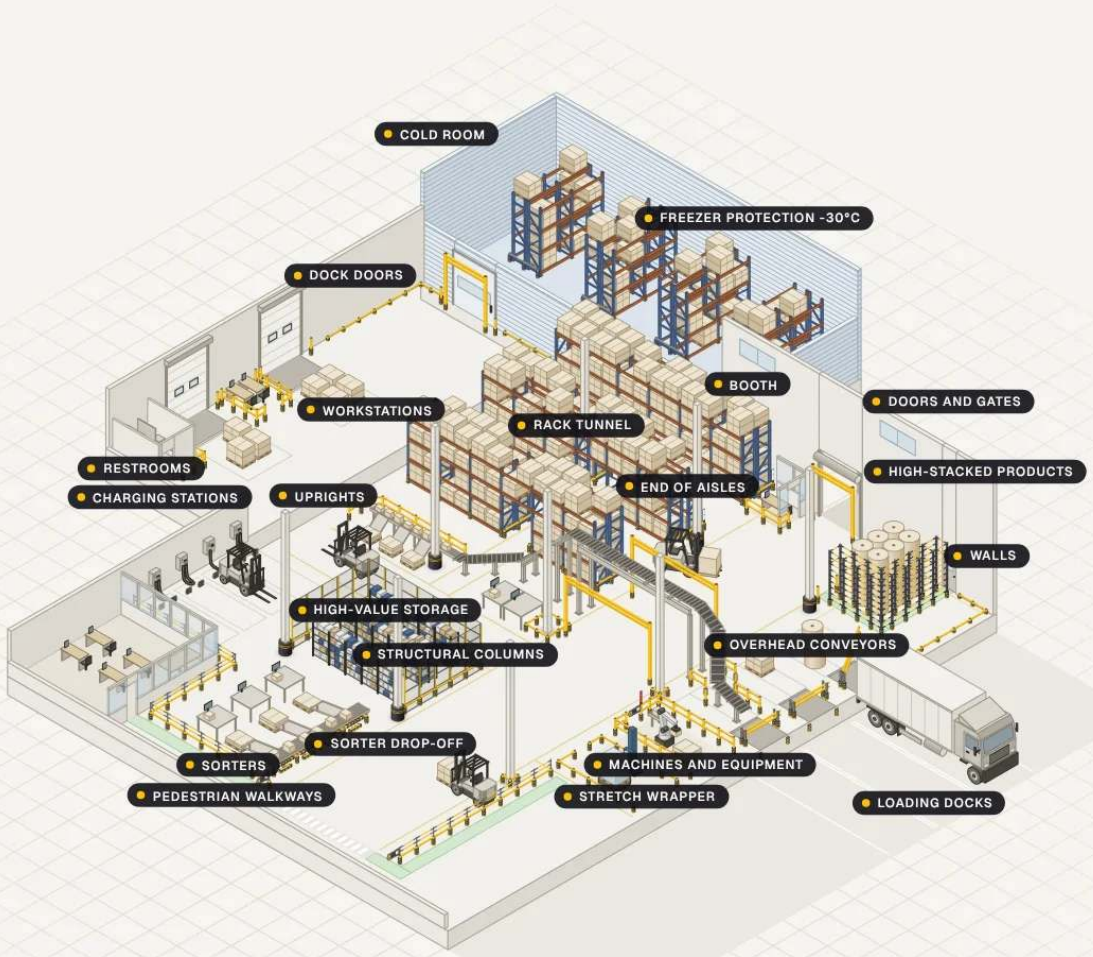
ENNAT APPLICATIONS

Distribution center

Protected end to end

APPLICATIONS

- Loading docks
- Workstations
- Machines and equipment
- Pedestrian walkways
- Charging stations
- Sorters
- High-value storage
- Doors and gates
- Walls
- End of aisles
- Uprights
- Rack tunnel
- Dock doors
- Restrooms



PRODUCT APPLICATIONS

Where ENNAT protects

Each application shows the products that protect it.

IN THE FIELD

Running in real operations

DHL

COCA-COLA

IKEA

KIMBERLY-CLARK

TRICOT

CASTAÑO

CODELPA

GEPP

WE BACK OUR PRODUCTS

The 24-month reliability promise

If a component becomes non-functional, we replace it.
